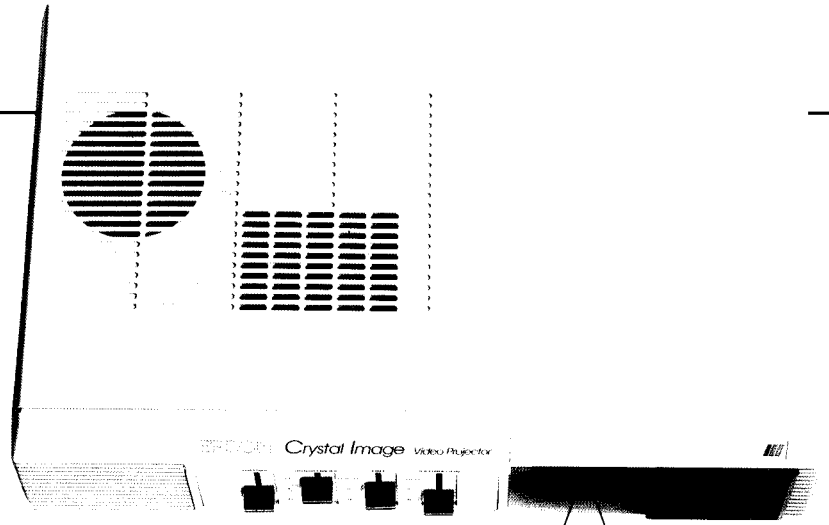
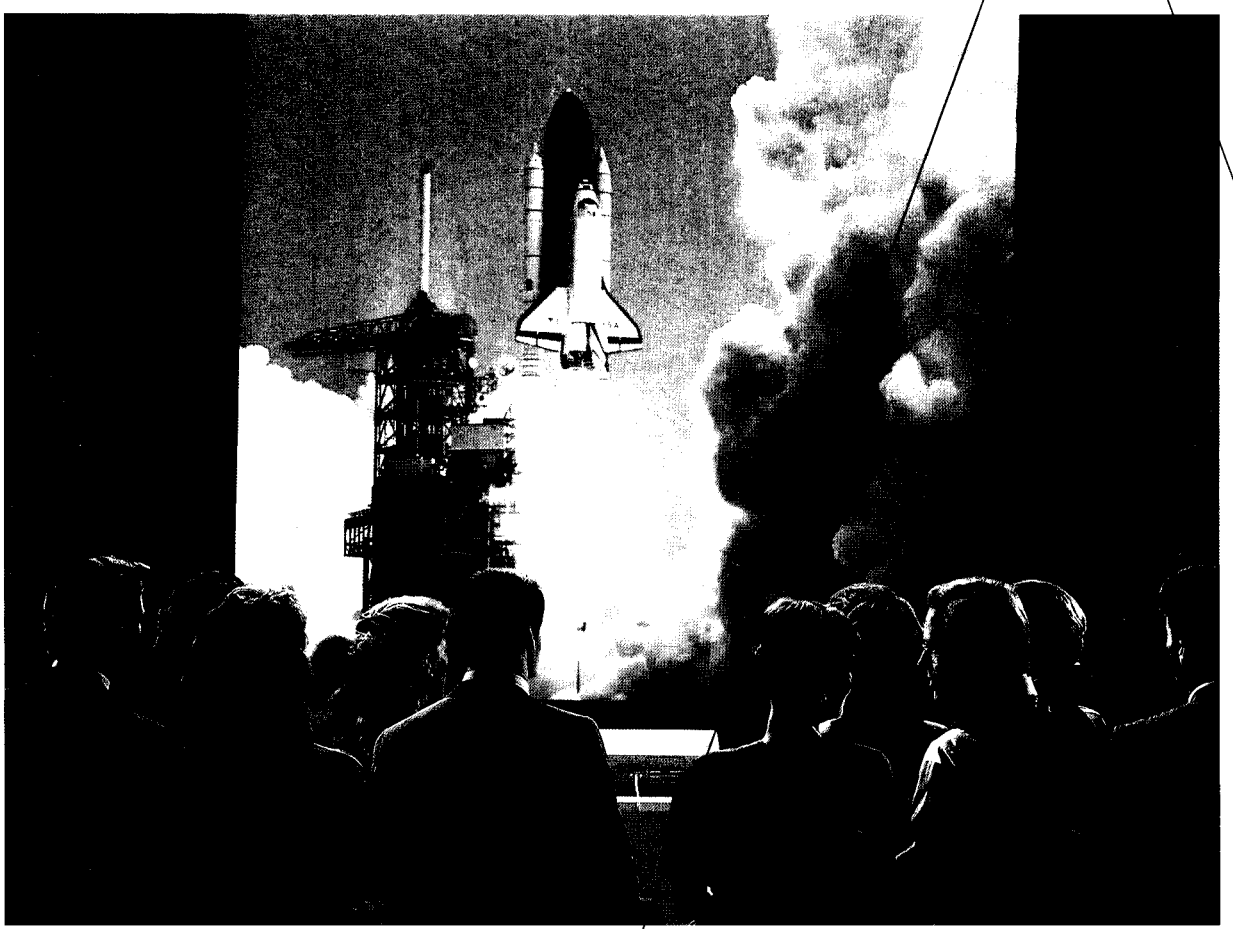
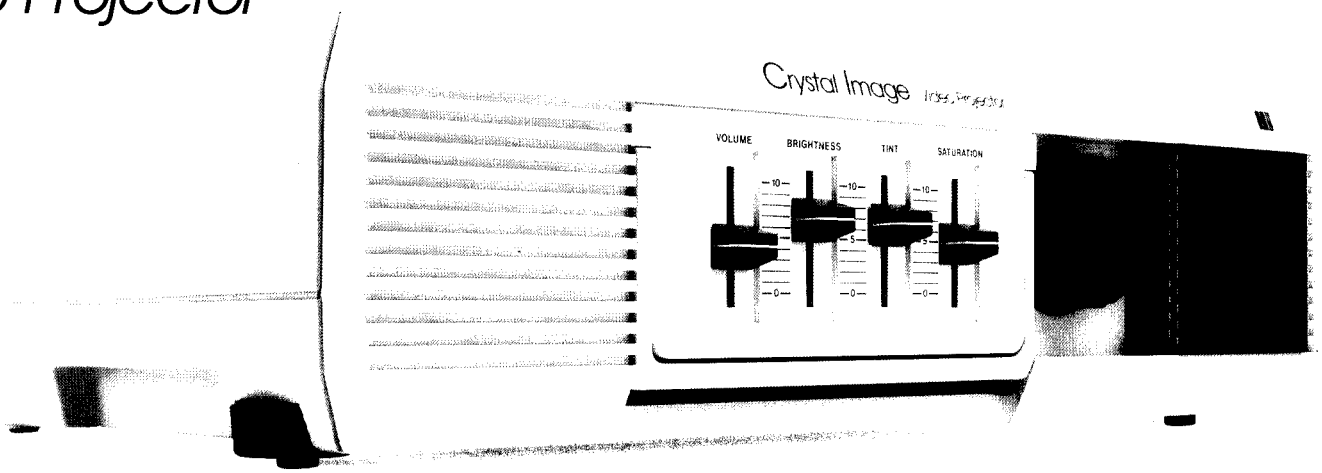
Crystal Image
Video Projector





Crystal Image
Video Projector



A full-featured projector with lightweight convenience

Epson's Crystal Image video projector is a convenient traveling partner that goes anywhere you go. In fact, at one-tenth the size of a typical video projector and a weight of less than 13 pounds, it's transportable in a moment's notice.

For cross-town training, a built-in handle makes carrying effortless. For cross-country meetings, Epson's Crystal Image easily fits under an airplane seat with room to spare. And when your presentation is over, you can readily store your projector most anywhere.

Yet, for all its compact size, Epson's Crystal Image offers a remarkable number of exceptional features to help you effectively communicate visual ideas.

Ready to present when you are

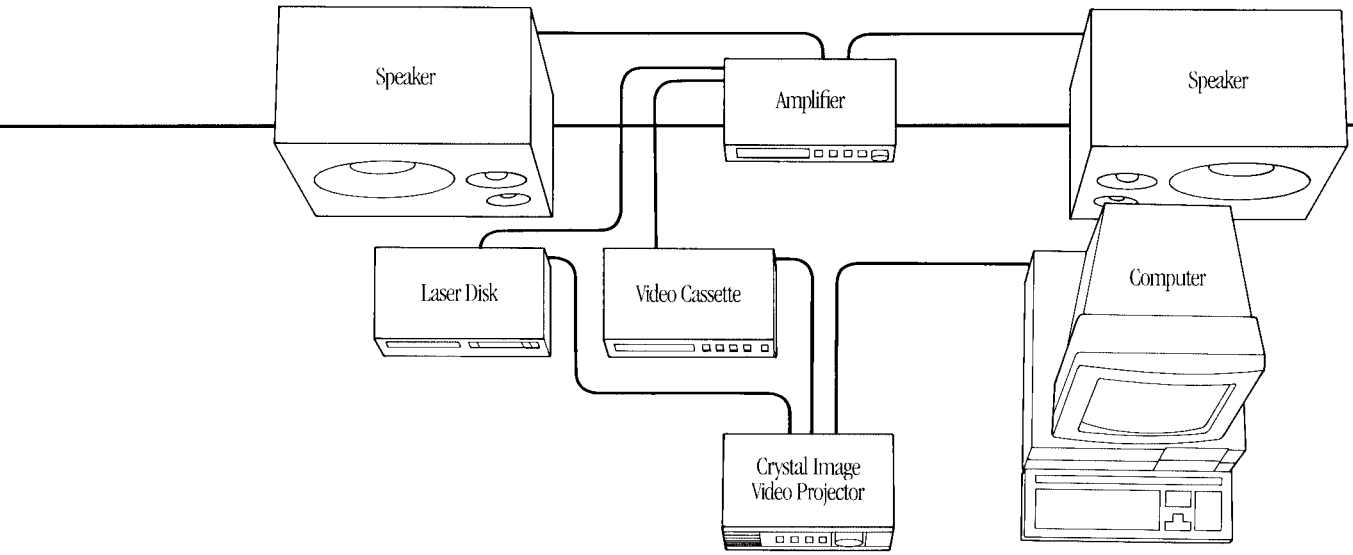
With Epson's Crystal Image video projector, you'll be able to set up and present in a matter of minutes.

No special screens and lenses are needed and the clearly-identified slide controls make operation simple even for a first-time user. Unique LCD technology eliminates convergence problems, so you'll be able to place the projector virtually anywhere in a room and still display large, clear images.

Show the big picture

Compatibility and flexibility are key advantages of this impressive video projector.

Epson's Crystal Image quickly connects to a VCR, laser disc player



or MS-DOS® compatible computer so you can alternate video, laser and computer images in a single presentation. Simply switch the input selector to another source in mid-meeting for added impact.

You will also be able to enhance the quality of sound. In addition to a built-in speaker, external stereo speaker jacks are provided for intensified audio accompaniment.

And your desired mix of sight and sound won't be compromised by the restrictions of a too small video monitor. Epson's Crystal Image projector projects onto a wall or screen color images as large as 12 feet diagonally so viewers in the back will experience the same impact as those in the front.

Project a bright image

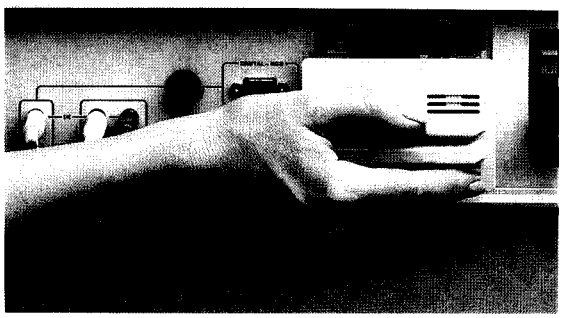
The quality of your presentation says a lot about you or your company. Epson's Crystal Image projector will help showcase your professional image by making first impressions last.

Crystal Image reliably shows sharp, bright and true to color images. Type will be clean, graphics distinctive, and visuals striking.

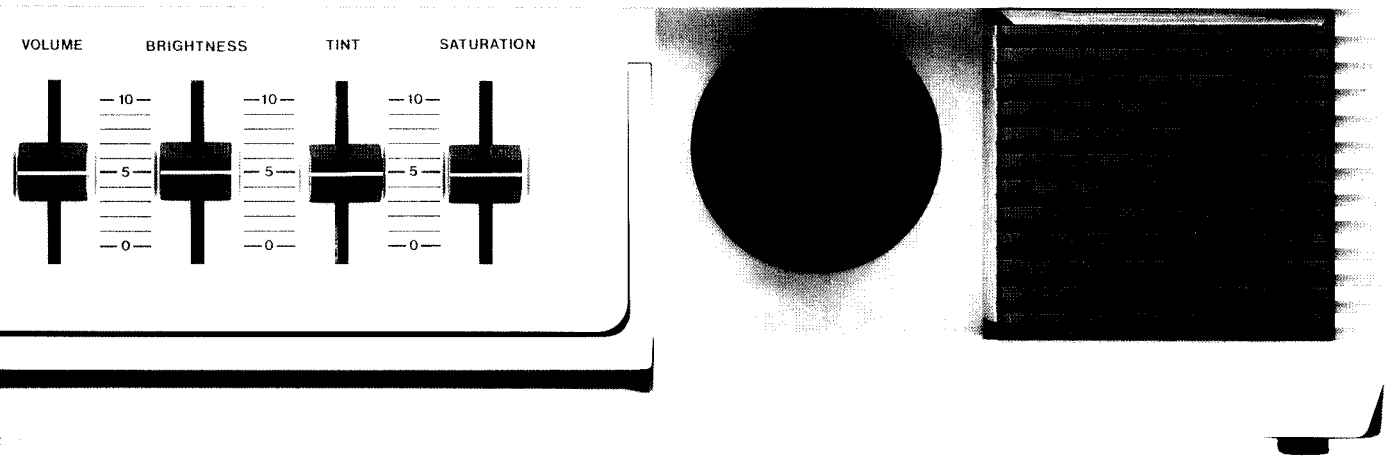
Epson's Crystal Image projects full NTSC video and both digital and analog RGB computer data with 320 x 200 (CGA) resolution. A three-position switch designates composite video, digital RGB or analog RGB input signals.

Accessories for added ease-of-use

Epson's streamlined optional carrying/storage case will protect



Lamp modules easily snap-in for quick bulb replacement during presentations.



your projector for years to come. This attractive, high quality plastic case comes complete with a specially-designed foam deck that holds all cables and connections as well.

Optional lamp replacement modules offer extra protection in case a bulb should burn out. Modules allow you to conveniently snap in another bulb in seconds – without any disassembly or lengthy interruptions.

Products of quality. Products that represent better ideas.

For over 20 years Epson has been a leader in computer products, defining new levels of consumer need, designing with past, present and future technological compatibility in mind.

The portable, compatible and affordable Epson Crystal Image Video Projector, confidently backed by a one year limited warranty and supported by a nationwide service network, continues that tradition with exceptional, reliable performance.
